Step in.
Spark curiosity.
Instil a sense of possibility.
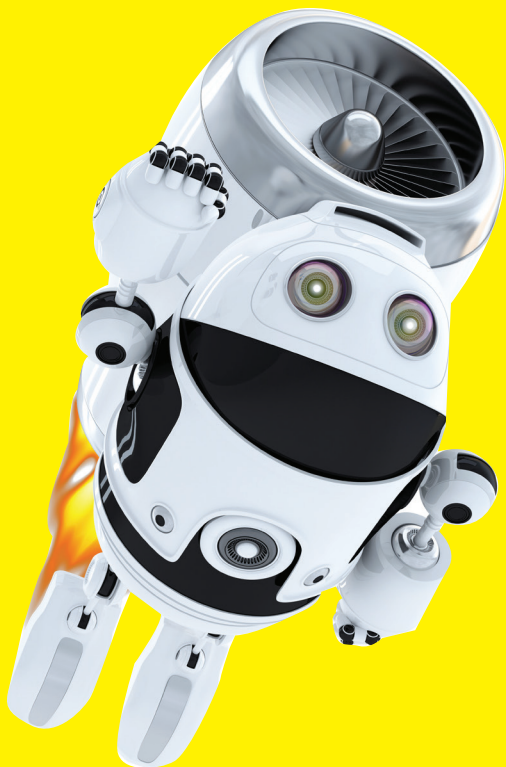

Is the Challenge suitable for my school?

If you teach students in Years 3-6 in South Australia, the Commissioner's Digital Challenge is for your school.

- Improve the confidence and capability of teachers around digital technology.
- Increase student agency with a Challenge built from South Australian children's voices.
- Even without devices, take part using the array of unplugged options.
- Earn and win digital rewards for your school.

Can my school register?

- Schools can register for Years 3-6 only.
- Not all Year 3-6 students/classes need to take part – but the more the merrier!
- To reach as many children as possible, we encourage schools to register where possible.

I teach a class outside Years 3-6 – can my students still take part?

Your students can still take part as individual participants and will still receive certificates. However, only registered schools (Years 3-6) are eligible to win rewards.

What happens when I register my school?

When you register, your school will be listed on the Commissioner's Digital Challenge website as a registered school.

You will receive the exclusive 'Commissioner's Digital Challenge school' electronic seal that you can display on any school assets you wish such as your website, newsletter and social media.

You'll also be sent an information pack containing:

- simple guidelines for Challenge Coordinators
- posters and other promotional material to share with teachers, parents and students.

Rewards*

Registered schools completing the Challenge are eligible to win enticing rewards including class sets of micro:bits, programmable camera drones and even a custom-built school website.

All participating schools gain access to three Microsoft webinars created for the Challenge – more details coming soon.

Certificates will be sent to all students who complete the Challenge.

*Terms and conditions apply

Preregister now to ensure your school is included on the Challenge website before the Challenge goes live:
