

ZOOM OUT

Systems Thinking

PRINT & KEEP GUIDE

The 6 simple steps for Challenge Coordinators at schools.

STEP 1

Register your school.

School registrations open 27 January 2021 and close 2 July 2021. The Challenge is open to all year levels. Register at commissionersdigitalchallenge.net.au/register

STEP 2

Spread the word.

Share news of your school's involvement with the Challenge with teachers, students, parents and carers using the free Challenge promo materials. There are posters to print and display, a digital postcard for your school newsletter and a social media post plus the official 'Registered School' seal.

STEP 3

Provide the Student Record forms.

Print or electronically share the Zoom Out Student Systems Thinking Record with all students taking part at your school.

STEP 4

Complete any of the three challenge activities.

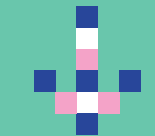

Zoom Out consists of three options:

- 1 Systems are Everywhere – a series of online step-by-step micro activities.
- 2 Create a Sytem – a PDF activity with lesson plan that uses balloons or other simple materials.
- 3 Make a Kinder System – a PDF activity with lesson plan that takes the idea of systems thinking further.

STEP 5

Submit Challenge completion form for your school online.

Tell us what your school learned for a chance to win enticing digital prizes for your school. Challenge closes 24 September 2021.

STEP 6

Distribute rewards!

In addition to digital prizes, every student taking part receives formal recognition from the Commissioner, and High Achiever Schools are awarded a Certificate of Recognition.

There are also **digital thinking** and **design thinking** challenges to try!
